A few comments...

First off I would like to thank everybody for supporting the tournament, and helping out by e-mailing their army lists. Not many understood how the army lists were supposed to look. What to include, and what not to include. Instead of contacting all of you again and again to get the army lists right, I decided just to 'clean' them without asking. Typically I removed battle standards, magic levels and barding for mounts. That is why the points left open in your army list probably is not the same as you thought they would be.

When you look at these army lists please remember that you will be able to buy everything you want for your characters, just NOT mounts of any kind. You also decide who is the general and which magic lores to use. For your units (not characters) you can ONLY buy magic banners, nothing else. Also keep in mind your army lists must be legal when you are done spending the open points!

The order of the army lists in this catalogue is the same order in which the armies will be auctioned away when the tournament kicks off.

For details on the actual auction please look here <http://www.bax.dk/Nifcon/Nifcon14.pdf>

Every team will receive a printed version of this catalogue on arrival at the tournament.

Without further hesitation, here is the army lists.

Happy meta gaming.
